Environmental Research Fellowship

April 2017 — May 2018

Purpose
The purpose of the TIE Fellowship is to conduct independent, interdisciplinary, environmental research projects.

Program Components
+ Funding of up to $5,000 per student to cover costs related to equipment, travel, and living stipends for data collection, data analysis, and research supplies.

Benefits
This is an opportunity for students to conduct primary data collection within your own area of interest and obtain mentorship and guidance from faculty and TIE staff to help build your research expertise.

TIE Fellows will become part of the cohort of more than 100 Tufts students and alumni who have participated in this fellowship since 2002. Research workshops, retreats, and presentations are also organized by and for the TIE Fellows in order to build skills and increase networks.

Program Components
+ Participation in the program workshops, retreats, presentations and other planned events in order to build skills and facilitate professional networking.

+ Presentation of fellowship research at at least one event for the greater Tufts community or global community.

+ Projects accepted for funding must include an interdisciplinary component and faculty mentors from at least two different schools or departments from within Tufts.

Matriculated graduate students at any of Tufts University’s graduate programs and professional schools are eligible to apply!

Application Deadline:
All students must apply for the 2017-2018 Fellowship by February 24th, 2017. Applicants must be enrolled at Tufts for the duration of the fellowship.
